

Python PDF Processing Sample Document

This is a sample PDF document generated for Python day19 file handling practice. It contains text, lists, and a structured data table to demonstrate PDF extraction capabilities.

Key Features Demonstrated:

- Multi-page flowable layout using ReportLab.
- Custom typography and corporate color palette.
- Styled tables with cell formatting.

ID	Topic	Status	Difficulty
01	Text Files (.txt)	Completed	Easy
02	CSV/Excel Data	Completed	Medium
03	JSON/XML/YAML	Completed	Medium
04	PDF/Images	In Progress	Hard
